

K-LOVE has been invaluable to me since I have moved to TX. I was able to listen while in NC and was thrilled to find it in TX as well. Moving is a stressful time and being able to listen to K-LOVE enabled me to get the things I needed done. It's the only station I listen to because it is commercial free and only plays positive music. I don't want to expose my children or myself to the negative lyrics and commercials you hear on commercial radio. If K-LOVE were to be displaced by an LPFM the result would be disastrous. I know close to a hundred people in my church community alone that listen. Many of these people including myself would cease to listen to radio at all if KLOVE were not on the air. What better thing for a community than to have its citizens be able to listen to a station which only plays positive and encouraging music that builds them up so that they can then build up others. Please reconsider expanding LPFM stations to take priority over current FM translator services. I think the result would have a negative impact on my community.
